PROJECTS

Sneaker Street — *eCommerce Sneaker Marketplace*

SneakerStreet is a platform designed for buying and selling sneakers online. The website offers a user-friendly interface for browsing sneakers, placing orders, and tracking purchases. Buyers can explore a wide range of sneakers and make secure purchases.

PyPassManager — Self Hosted, Python-based Password Manager

PyPassManager is a Password Manager built with Django. It uses RSA Encryption to locally store the passwords in a database. It is meant to be self-hosted on a personal/home server.

EXPERIENCE

Shoffr, Bangalore— *Summer Intern*

April 2018 - May 2018

Built email templates for automated emails to be sent to clients and worked on developing an Alexa Skill bot for their application.
